

# METAL PROGRESS

THE MAGAZINE OF MATERIALS AND PROCESS ENGINEERING

Volume 93

January 1968 through June 1968

## Subject Index

- Adhesive bonding**  
Adhesive Bonding Holds Down Costs, Staff Report ..... 5-111  
The Pros and Cons of Adhesive Bonding, Staff Report ..... 5-108
- Aging**  
Aging of Enameling Steels, by Neale E. Orrok ..... 6-160
- Aircraft**  
Big Shapes Are Backbone of Boeing 747, by Gary Michaelson ..... 3-59  
The F-111 Logic: Familiar Materials; Proven Processes, by Harry I. McHenry and Rupert E. Key ..... 3-62
- Alloy steels**  
AISI-SAE Standard H-Steel Compositions (Data Sheet) ..... 5-87
- Aluminum alloys**  
Big Shapes Are Backbone of Boeing 747, by Gary Michaelson ..... 3-59  
Die Pickup Can Be Explained, by Aavo I. Kempinen ..... 6-147  
The F-111 Logic: Familiar Materials; Proven Processes, by Harry I. McHenry and Rupert E. Key ..... 3-62  
Forging Aluminum for Everyday Applications, by Clifford A. Michaels ..... 5-125  
Guide to Better Anodized Finishes ..... 6-60  
Selecting Aluminum Alloys for Anodizing (Data Sheet) ..... 6-73
- Anodizing**  
Guide to Better Anodized Finishes ..... 6-60  
Selecting Aluminum Alloys for Anodizing (Data Sheet) ..... 6-73
- Automobiles**  
Oldsmobile's Plating Formula Lengthens Bumper Life, by Ralph H. Eshelman... 6-91
- Bearings**  
Valuable Results From Bearing Damage Analysis, by Ronald L. Widner and Jerry O. Wolfe ..... 4-79
- Brass**  
Cerro's 5,500-Ton Squeeze: It's the Brass Industry's Biggest ..... 2-117
- Brazing**  
Vacuum Brazed Titanium Lowers Section Weight by 44%, by Donald C. Dille... 5-115
- Carbon steels**  
Standard Carbon Steels (Data Sheet)... 2-75
- Characterization**  
Characterization . . . Industry's Most Urgent Materials Problem, Special Report ..... 4-60  
Characterization . . . Materials Users Pinpoint Problems  
Commercial Quality Is an Abused Term, by Charles H. Lelan ..... 4-74  
Computer Aids in Characterization, by Roy F. Kern ..... 4-65  
Designer Needs Information That Is Costly to Obtain, by Nicholas P. Milano ..... 4-77  
Designers Cannot Rely on Consistent Shrinkage, by John A. Disantis ..... 4-70
- Do We Know What We Want?, by Hiram Brown ..... 4-71  
Each Processing Step Changes a Material, by James H. Keeler ..... 4-65  
Effective Characterization Is an Active Process, by Alan V. Levy ..... 4-78  
Even Common Materials Don't Follow the Book, by Wallace J. Erichsen... 4-68  
Even Familiar Materials Can Cause Trouble, by Louis Zakraysek ..... 4-64  
Fabrication Environment Must Be Spelled Out, by T. W. Morrison .... 4-73  
High Cost Rules Out Checking All Lots, by Herman D. Greenberg .... 4-75  
Inadequate Knowledge Forces Compromises, by Arnold L. Rustay ..... 4-75  
Interdisciplinary Approach Aids Characterization, by Dean K. Hanink .. 4-67  
Multilevel Standards Should Be Developed, by Donald A. Dashfield ..... 4-69  
Not Enough Is Known About Gear Materials, by Harold J. Bates ..... 4-68  
Performance of Parts Is Hard to Predict Pertinent Information Not Always Available, by Ronald D. Crooks .... 4-71  
Problems Still Possible When You Buy Entire Run, by John A. Erickson .... 4-76  
Processing Experience Should Be Utilized, by William H. Charlesworth... 4-69  
Proper Characterization Is Big Challenge, by Abraham Hurlich ..... 4-66  
Reliability Demands Complicate Situation, by Andrew N. Hoover ..... 4-67  
Results of Standard Tests Leave Much to Be Desired, by Paul G. Nelson... 4-74  
Safety Factors Called 'Factor of Ignorance,' by G. Fred Bush ..... 4-72  
Scatter in Published Data Promotes Trial and Error, by R. R. Reisinger... 4-76  
31,000 Psi Material Makes 21,000 Psi Parts, by R. C. Tittel ..... 4-64  
Underestimation of Use Explains Many Failures, by Vernon E. Hense ..... 4-67  
User Can't Control Variables at Mill, by Elihu F. Bradley ..... 4-70  
User Relies Heavily on Supplier Information, by Joseph A. Cameron .... 4-78  
We Should Find Out How Products Are Misused, by Wilson T. Groves ..... 4-74  
What Designer Specifies Must Be Translated, by Jack E. LaBelle ..... 4-72
- Chemical milling**  
Chemical Milling of Aerospace Parts, by Raymond E. Smith ..... 5-149
- Chromium plating**  
Oldsmobile's Plating Formula Lengthens Bumper Life, by Ralph H. Eshelman... 6-91
- Cleaning**  
Better Cleaning With Ultrasonics, Staff Report ..... 6-102  
New Vapor Degreasing Solvent Also Fights Air Pollution, by Kenneth S. Surprenant ..... 6-105
- Coatings**  
Coating 'Starts' at Design Stage, by Donald L. Kummer, John D. Culp, and Barry G. Fitzgerald ..... 3-78
- Cobalt alloys**  
High Strength . . . Ductility . . . Corrosion Resistance . . . Multiphase
- Alloys Have All Three, by Gaylord D. Smith and Daniel H. Yates ..... 3-100
- Columbium alloys**  
Properties of Commercially Available Refractory Metal Alloys (Data Sheet)... 3-83
- Containers**  
Stronger Materials Cut Operating Costs, Increase Payloads, by William F. McGarrity ..... 2-58
- Diffusion coatings**  
Diffusion Coatings Formed in Molten Calcium Impart High Corrosion Resistance, by Giles F. Carter..... 6-117
- Dispersion hardening**  
Microvoids Influence Metal Properties, by Donald Webster ..... 1-93
- Drawing**  
Tube Drawing, Draw Ironing, Flare and Flange Forming . . . With an Ultrasonic Assist, by J. Byron Jones ..... 5-103
- Editorial**  
Get Your Product Off to a Better Start, by Allen G. Gray ..... 6-59  
The High Price of Complacency, by Allen G. Gray ..... 5-59  
Needed: Wide-Angle Decisions, by Allen G. Gray ..... 3-57  
Solve Today's Problems With Today's Technology, by Allen G. Gray ..... 1-57  
Unknowns in Materials Show Up in Unexpected Costs, by Allen G. Gray.. 4-59  
What is the Total Cost?, by Allen G. Gray ..... 2-57
- Electric appliances**  
Materials in a Self-Cleaning Oven, Staff Report ..... 1-71
- Electrical discharge machining**  
How GE Make EDM Electrodes, by Don E. Dutt ..... 2-134
- Electrodes**  
How GE Makes EDM Electrodes, by Don E. Dutt ..... 2-134
- Electron microscopes**  
Million-Volt Metallurgy . . . The New Generation of Electron Microscopes, by Robert M. Fisher ..... 2-66
- Electroplating**  
Oldsmobile's Plating Formula Lengthens Bumper Life, by Ralph H. Eshelman .. 6-91  
Painting With Electricity Speeds Production, Lowers Costs, Improves the Finish, interview report with Carrol O. Hutchinson ..... 6-99  
Plating by the Book Stretches Nickel Supplies, interview report with A. C. Benning ..... 6-88  
Plating Bore of Long Cylinders in Horizontal Position, by V. Peter Greco .... 6-112  
The Role of Design in Better Electroplating, by William F. Sofraneck .... 6-67  
Tailored Procedures for Plating on Magnesium, by Peter Fintschenko and Earl C. Groshart ..... 6-94  
Ways to Electroplate High-Strength Steels

Without Embrittlement, by Raymond R. Rogers .....	6-85	<b>Free-machining steels</b> Standard Carbon Steels (Data Sheet) ...	2-75	nesium, by Peter Fintschenko and Earl C. Groshart .....	6-94
<b>Extrusion</b> Are Shear Spinning and Roll Extrusion Production Processes for Large Parts?, by Jerome E. Gott, John M. Lynch, and Samuel M. Jacobs .....	3-95	<b>Gas carburizing</b> Equilibria for Gas Carburizing (Data Sheet) .....	4-89	<b>Magnetic materials</b> Characteristics of Permanent Magnet Materials (Data Sheet) .....	1-82
Big Shapes Are Backbone of Boeing 747, by Gary Michaelson .....	3-59	<b>Gas-fired furnaces</b> 2,250 F Furnace Heats Superalloy Plates .....	5-121	Permanent Magnet Materials, by Carl R. Weymueller .....	1-77
Cerro's 5,500-Ton Squeeze: It's the Brass Industry's Biggest .....	2-117	<b>Gas tungsten-arc welding</b> Welding the Critical Spacecraft Structures, by J. Russell Harrison .....	3-89	<b>Magnetic-pulse forming</b> Industry Develops Niche for Magnetic-Pulse Forming, by David F. Brower .....	4-95
Die Pickup Can Be Explained, by Auvo I. Kemppinen .....	6-147	<b>Gray iron</b> Heat Treating Cylinder Liners by the Thousands, by Ralph H. Eshelman .....	1-91	<b>Martempering</b> Heat Treating Cylinder Liners by the Thousands, by Ralph H. Eshelman .....	1-91
<b>Fasteners</b> Valuable Results From Bearing Damage Analysis, by Ronald L. Widner and Jerry O. Wolfe .....	4-79	<b>Hardenability</b> Calculating Hardenabilities of Boron-Treated Steels, by Richard L. Such and Frederick D. Delve .....	1-109	<b>Metallography</b> Million-Volt Metallography ... the New Generation of Electron Microscopes, by Robert M. Fisher .....	2-66
Why Titan's Bolts Failed, by Louis Raymond and Ernest G. Kendall .....	1-103	<b>Heat-resistant alloys</b> How Low-Carbon Contents Affect Superalloys by James P. Stroup and Leonard A. Pugliese .....	2-96	Phase Identification Pinpoints Failures in Cast, High Temperature Alloys .....	6-110
<b>Fasteners</b> Beryllium Fasteners Gain Aerospace Roles, by Edward F. Gowen, Jr. ....	5-71	<b>Heat treatment</b> Combining Nitriding With Induction Heating Pays a Bonus, by Sander A. Levy, Kenneth E. Barnes, and Joseph F. Libsch .....	6-108	<b>Microvoids</b> Microvoids Influence Metal Properties, by Donald Webster .....	1-93
Coated Ferrous Fasteners Can Do More Work, by Albert J. Parker .....	5-68	Equilibria for Gas Carburizing (Data Sheet) .....	4-89	<b>Missiles</b> Why Titan's Bolts Failed, by Louis Raymond and Ernest G. Kendall .....	1-103
Choosing and Using Fasteners for Service up to 1,400 F, by Andrew Schwartz Jr. ....	5-78	Guidelines for Heat Treating High-Strength Fasteners, by John T. Bingham .....	5-99	<b>Molybdenum alloys</b> Properties of Commercially Available Refractory Metal Alloys (Data Sheet) ...	3-83
Die-Cast Fasteners Are Designed for the Job, by Carl L. Chase .....	5-77	Guidelines for Heat Treating High-Strength Fasteners, by John T. Bingham .....	5-99	<b>Nickel alloys</b> How Low-Carbon Contents Affect Superalloys, by James P. Stroup and Leonard A. Pugliese .....	2-96
Few Materials Qualify for Cryogenic Service, by Kenneth M. Kulju .....	5-79	Heat Treating Cylinder Liners by the Thousands, by Ralph H. Eshelman .....	1-91	Inconel 625 ... An Alloy for Steam and Gas Turbines, by James F. Barker, Joseph D. Cox, and Eli Margolin .....	4-91
Guidelines for Heat Treating High-Strength Fasteners, by John T. Bingham .....	5-99	<b>High-strength steels</b> Materials Technology of Hydrospace Pressure Hulls, by Aaron D. Shankman .....	3-69	Melting Inconel 718 by Vacuum Induction, by W. Bruce Aufderhaar .....	6-135
IFI-104—A Step in the Right Direction, by Joseph S. Orlando .....	5-62	Steels ... for Deep Quest and DSRV-1, by Leo Schapiro .....	3-74	Rene 77 ... A New Alloy for Turbine Blades, by Earl W. Ross .....	1-89
In Designing High-Strength Fasteners, Use Systems, Concept, by Arthur R. Breed .....	5-76	Stronger Materials Cut Operating Costs, Increase Payloads, by William F. McGarrity .....	2-58	<b>Nickel-cobalt alloys</b> High Strength ... Ductility ... Corrosion Resistance ... Multiphase Alloys Have All Three, by Gaylord D. Smith and Daniel H. Yates .....	3-100
MP35N ... a Multiphase Alloy for High-Strength Fasteners, by A. Craig Hood .....	5-81	They Serve a Vital Role in the Trailer Industry, by Eugene Chosy .....	2-63	MP35N ... a Multiphase Alloy for High-Strength Fasteners, by A. Craig Hood .....	5-81
Plastics Catch On as Fastener Materials, by Joseph Saks .....	5-72	Ways to Electroplate High-Strength Steels Without Embrittlement, by Raymond R. Rogers .....	6-85	<b>Nickel plating</b> Oldsmobile's Plating Formula Lengthens Bumper Life, by Ralph H. Eshelman ...	6-91
Proper Bolt Preloads Insure Serviceability, by Frederick E. Graves .....	5-61	What You Can Do About Wear, Staff Report .....	3-121	Plating By the Book Stretches Nickel Supplies, interview report with A. C. Benning .....	6-88
Proper Design, Processing Prevent Brittle Fracture, by A. Craig Hood .....	5-67	<b>Hulls</b> Materials Technology for Hydrospace Pressure Hulls, by Aaron D. Shankman .....	3-69	<b>Nitriding</b> Combining Nitriding With Induction Heating Pays a Bonus, by Sander A. Levy, Kenneth E. Barnes, and Joseph F. Libsch .....	6-108
Self-Drilling Screws Make Assembly Easier, Faster, by Louis A. Oest .....	5-75	Steels ... for Deep Quest and DSRV-1, by Leo Schapiro .....	3-74	<b>Numerical control</b> Where Numerical Control is Making Headway, by Harry B. Randall Jr. ....	4-101
A Status Report on Boron-Steel Fasteners, by H. Charles Weidner Jr. ....	5-70	<b>Hydrogen embrittlement</b> Why Titan's Bolts Failed, by Louis Raymond and Ernest G. Kendall .....	1-103	<b>Ovens</b> Materials in a Self-Cleaning Oven, Staff Report .....	1-71
Titanium Fasteners Win Civilian Applications, by Karl W. Will .....	5-64	<b>Induction heating</b> Combining Nitriding With Induction Heating Pays a Bonus, by Sander A. Levy, Kenneth E. Barnes, and Joseph F. Libsch .....	6-108	<b>Painting</b> Painting With Electricity Speeds Production, Lowers Cost, Improves the Finish, interview report with Carrol O. Hutchinson .....	6-99
What Defects Mean to Users of Fasteners, by Rudolph C. Kozlik .....	5-65	<b>Induction melting</b> Melting Inconel 718 by Vacuum Induction, by W. Bruce Aufderhaar .....	6-135	<b>Permanent magnets</b> Characteristics of Permanent Magnet Materials (Data Sheet) .....	1-82
What's New in Fasteners?, an MP Forum .....	5-60	<b>Investment castings</b> Inclusion Control Strengthens Investment Castings, by Steve Morykwas .....	3-115	Permanent Magnet Materials, by Carl R. Weymueller .....	1-77
Why and Where Blind Fasteners Are Used, by Herbert M. Wittmeyer .....	5-73	<b>Lead plating</b> Plating Bores of Long Cylinders in Horizontal Position, by V. Peter Greco .....	6-112	<b>Porcelain enameling</b> How To Design and Fabricate Sheet Steel Parts for Porcelain Enameling ..	6-163
<b>Finishing</b> Better Cleaning With Ultrasonics, Staff Report .....	6-102	<b>Maraging steels</b> Steels ... for Deep Quest and DSRV-1, by Leo Schapiro .....	3-74	<b>Pressure vessels</b> Materials Technology for Hydrospace Pressure Hulls, by Aaron D. Shankman .....	3-69
Guide to Better Anodized Finishes .....	6-60	Materials Technology for Hydrospace Pressure Hulls, by Aaron D. Shankman .....	3-69		
New Vapor Degreasing Solvent Also Fights Air Pollution, by Kenneth S. Surprenant .....	6-105	<b>Machining</b> How to Cut the Standard Grades, by Deo M. Blott .....	2-77		
Oldsmobile's Plating Formula Lengthens Bumper Life, by Ralph H. Eshelman ...	6-91	New Processes, Alloys, Fluids Make Job Easier, by Donald G. Klingensmith ...	2-84		
Painting With Electricity Speeds Production, Lowers Costs, Improves the Finish, interview report with Carrol O. Hutchinson .....	6-99	What to Consider in Choosing an Alloy, by Charles A. Divine Jr. ....	2-91		
Plating Bores of Long Cylinders in Horizontal Position, by V. Peter Greco .....	6-112	<b>Magnesium</b> Tailored Procedures for Plating on Mag-			
Plating By the Book Stretches Nickel Supplies, interview report with A. C. Benning .....	6-88				
The Role of Design in Better Electroplating, by William H. Safranek .....	6-67				
Tailored Procedures for Plating on Magnesium, by Peter Fintschenko and Earl C. Groshart .....	6-94				
Ways to Electroplate High-Strength Steels Without Embrittlement, by Raymond R. Rogers .....	6-85				
<b>Forging</b> Forging Aluminum for Everyday Applications, by Clifford A. Michaels .....	5-125				
<b>Forming</b> Forming Hardened Strip Steel, by Axel Bernstein .....	4-99				
Industry Develops Niche for Magnetic-Pulse Forming, by David F. Brower ...	4-95				
Tube Drawing, Draw Ironing, Flare and Flange Forming ... With an Ultrasonic Assist, by J. Byron Jones .....	5-103				

Steels . . . for Deep Quest and DSRV-1, by Leo Schapiro . . . . .	3-74	and Frederick D. Delve . . . . .	1-109	<b>Ultrasonic cleaning</b> Better Cleaning With Ultrasonics, Staff Report . . . . .	6-102
<b>Refractory metals</b> Coating 'Starts' at Design Stage, by Donald L. Kummer, John D. Culp, and Barry G. Fitzgerald . . . . .	3-78	Combining Nitriding With Induction Heating Pays a Bonus, by Sander A. Levy, Kenneth E. Barnes, and Joseph E. Libsch . . . . .	6-108	<b>Ultrasonic forming</b> Tube Drawing, Draw Ironing, Flare and Flange Forming . . . With an Ultra- sonic Assist, by J. Byron Jones . . . . .	5-103
Properties of Commercially Available Refractory Metal Alloys (Data Sheet) . . .	3-83	Forming Hardened Strip Steel, by Axel Bernstein . . . . .	4-99	<b>Vacuum brazing</b> Vacuum Brazed Titanium Lowers Section Weight by 44%, by Donald C. Dilley . . .	5-115
<b>Reliability</b> A Statistical Interpretation of Reliability, by Charles Lipson . . . . .	2-70	How To Design and Fabricate Sheet Steel Parts for Porcelain Enameling . .	6-183	<b>Vacuum melting</b> Melting Inconel 718 by Vacuum Induc- tion, by W. Bruce Aufderhaar . . . . .	6-135
<b>Rhenium</b> Where Rhenium Is Growing, by Jon W. Spelman . . . . .	2-103	Materials in a Self-Cleaning Oven, Staff Report . . . . .	1-71	<b>Vapor degreasing</b> New Vapor Degreasing Solvent Also Fights Air Pollution, by Kenneth S. Surprenant . . . . .	6-105
<b>Rolls</b> 2,250 F Furnace Heats Superalloy Plates . .	5-121	What You Can Do About Wear, Staff Report . . . . .	3-121	<b>Wear</b> What You Can Do About Wear, Staff Report . . . . .	3-121
<b>Spacecraft</b> Welding the Critical Spacecraft Struc- tures, by J. Russell Harrison . . . . .	3-89	<b>Stress corrosion</b> Now You Can Test Type 431 Parts for Stress Corrosion, by Alfred H. Wendelbo . . . . .	3-109	<b>Welding</b> Intrinsic Thermocouple Monitors Weld- ing, by George E. Cook and W. M. McC Campbell . . . . .	6-176
<b>Spinning</b> Are Shear Spinning and Roll Extrusion Production Processes for Large Parts?, by Jerome E. Gott, John M. Lynch, and Samuel M. Jacobs . . . . .	3-95	<b>Submarines</b> Steels . . . for Deep Quest and DSRV-1, by Leo Schapiro . . . . .	3-74	Welding the Critical Spacecraft Struc- tures, by J. Russell Harrison . . . . .	3-89
<b>Stainless steels</b> How to Cut the Standard Grades, by Deo M. Blott . . . . .	2-77	<b>Tantalum alloys</b> Properties of Commercially Available Re- fractory Metal Alloys (Data Sheet) . . .	3-83	<b>Westec</b> Aerospace Engineers Learn of Latest De- velopments in Materials, Fabrication, Computer Applications . . . . .	4-109
New Processes, Alloys, Fluids Make Job Easier, by Donald G. Klingensmith . . .	2-84	<b>Technology Forecast</b> Technology Forecast '68 . . . . .	1-58	<b>White iron</b> What You Can Do About Wear, Staff Report . . . . .	3-121
Now You Can Test Type 431 Parts for Stress Corrosion, by Alfred H. Wendelbo . . . . .	3-109	<b>Titanium alloys</b> Materials Technology for Hydrospace Pressure Hulls, by Aaron D. Shankman Vacuum Brazed Titanium Lowers Section Weight by 44%, by Donald C. Dilley . .	5-115	<b>Zinc plating</b> Tailored Procedures for Plating on Mag- nesium, by Peter Fintschenko and Earl C. Grashart . . . . .	6-94
What to Consider in Choosing an Alloy, by Charles A. Divine Jr. . . . .	2-91	<b>Trailers</b> They Serve A Vital Role in the Trailer Industry, by Eugene Chosy . . . . .	2-63		
<b>Steels</b> Aging of Enameling Steels, by Neale E. Orrak . . . . .	6-160	<b>Trucks</b> Stronger Materials Cut Operating Costs, Increase Payloads, by William F. Mc- Garrity . . . . .	2-58		
Calculating Hardenabilities of Boron- Treated Steels, by Richard L. Szuch		They Serve A Vital Role in the Trailer Industry, by Eugene Chosy . . . . .	2-63

# Metal Progress Subject Index

## Vol. 94, July 1968 through December 1968

<b>Alloy steels</b>			
Cooling Transformation Diagram for AISI 8640 (ds) .....	3-84		
Hardenability Bands for Special SAE H-Steels (ds) .....	1-87		
Tailormade Steels . . . What They Are, How to Get Them, by Thomas E. Perry (interview) .....	3-72		
<b>Aluminum-silicon alloys</b>			
Powders Beef-Up Al-Si Alloys, by Hugh M. Skelly and Cyril F. Dixon .....	5-103		
<b>Anisotropy</b>			
How Crystallographic Texture Controls Drawability, by Roger L. Whiteley ..	5-81		
<b>Annealing</b>			
Annealing Pipe Welds 'in Motion', by George F. Bobart .....	1-78		
<b>Ausforming</b>			
Modified Ausforming Strengthens Springs, by Robert A. Bock and William M. Justusson .....	6-107		
<b>Automobiles</b>			
Exterior Applications of Plastics on Pontiacs, by Donald B. Dobbins .....	4-191		
Heat-Treated Ferrous Alloy Components in Automobiles and Trucks (ds) .....	4-131		
How Chrysler Makes and Tests Automotive Castings, by Robert B. Boswell	4-225		
A Look at Automotive Technology in Europe, by Allen G. Gray .....	4-151		
Materials Combination Eliminates Production Problems, by Donald J. Castle	4-205		
MP Round Table . . . Competition Among Materials and Processes in the Automotive Industry: The Quiet Revolution .....	4-110		
Powder Metals in Tomorrow's Cars, by Carl R. Weymueller .....	4-171		
Welding in the Auto Industry, by Neale E. Orrak .....	4-141		
<b>Bars</b>			
Mechanical Properties of Cold-Drawn, Carbon-Steel Bars (ds) .....	6-85		
<b>Butt welding</b>			
Old Process Solves an Old Problem . . . Upset Butt Welding, by Erman V. Cavagnero and Joseph F. Loftus ....	6-60		
<b>Castings</b>			
How Chrysler Makes and Tests Automotive Castings, by Robert B. Boswell .....	4-225		
A Look at Automotive Technology in Europe, by Allen G. Gray .....	4-151		
Selecting Alloys for Heat-Treated Auto and Truck Components, by Carl R. Weymueller .....	4-125		
<b>Cold forming</b>			
Three Forming Methods That Pay Off at Buick, by Carl R. Weymueller .....	4-122		
<b>Continuous casting</b>			
Refractories for Continuous Casting, by Gerald R. Cope .....	3-109		
<b>Cooling curves</b>			
Cooling Transformation Diagram for AISI 8640 (ds) .....	3-84		
<b>Drawability</b>			
How Crystallographic Texture Controls Drawability, by Roger L. Whiteley ...	5-81		
<b>Editorial</b>			
Fighting the Quality-Cost Squeeze, by Allen G. Gray .....	2-59		
How Much Does It Really Cost?, by Allen G. Gray .....	1-59		
Men With a Purpose, by Allen G. Gray	4-109		
Payoff for Titanium, by Allen G. Gray	3-57		
Teamwork Prevents Defects, by Allen G. Gray .....	6-59		
You Can Be More Creative, by Allen G. Gray .....	5-59		
<b>Electromagnetic materials</b>			
How to Improve Performance of Electromagnetic Materials, by Richard D. Weltzin, Larry J. Johnson, and Giles Cantin .....	3-76		
<b>Electron microscopy</b>			
The Scanning Electron Microscope . . . Its Operation and Use, by Om Johari	2-147		
<b>Forming</b>			
Ferritic Forming Prevents Scaling and Decarburization, by George F. Melloy	6-119		
Potentials for Forming Large Parts, Staff Report .....	5-95		
Three Forming Methods That Pay Off at Buick, by Carl R. Weymueller ....	4-122		
Tools for High-Velocity Forming, by Daniel E. Strohecker and H. James Henning .....	3-99		
<b>Friction welding</b>			
Design . . . Control . . . Keys to Quality in Friction (Inertia) Welding, by James F. Justice .....	1-91		
Where Friction (Inertia) Welding Is Used, by Richard W. Poseley .....	1-95		
<b>Hardenability bands</b>			
Hardenability Bands for Special SAE H-Steels (ds) .....	1-87		
<b>Heat treatment</b>			
Annealing Pipe Welds 'in Motion', by George F. Bobart .....	1-78		
Four Case Histories . . . Meeting the Quality Challenge With Vacuum Heat Treating			
1. An Around-the-Clock Operation. . .	3-89		
2. Processing Small Parts .....	3-91		
3. Processing Power Tool Components .....	3-94		
4. Processing Precision Castings ...	3-96		
Four Ways to Use Induction Heat Treating .....	1-81		
Heat-Treated Ferrous Alloy Components in Automobiles and Trucks (ds) ....	4-131		
Heat Treating by Induction . . . Dual-Frequency Hardening, by Harry B. Osborn Jr. ....	1-73		
Heat Treating Gears and Shafts by Induction, by Clayton L. Kirk .....	1-68		
Heat Treating With Low-Frequency Currents, by Revel E. Jennings .....	1-71		
Heat Treating Stainless Steel by Induction, by Joseph F. Libsch and P. Capolongo .....	1-75		
A Look at Automotive Technology in Europe, by Allen G. Gray .....	4-151		
Selecting Alloys for Heat-Treated Auto and Truck Components, by Carl R. Weymueller .....	4-125		
Selecting Steels for Heat-Treated Parts, by Roy F. Kern .....	5-60		
Part I—Direct-Hardenable Grades..	6-70		
Part II—Case-Hardenable Grades..	6-70		
Vacuum Heat Treating . . . Process With a Bright Future, by Norbert K. Koebel	3-93		
<b>High-energy-rate forming</b>			
Tools for High-Velocity Forming, by Daniel E. Strohecker and H. James Henning .....	3-99		
<b>High-strength steels</b>			
Eliminating Hydrogen Cracking, by William T. DeLong .....	5-74		
At 140,000 Psi: Joints as Strong as Parent Metal, by Martin T. McGowan ...	5-79		
<b>Hydroforming</b>			
Three Forming Methods That Pay Off at Buick, by Carl R. Weymueller ....	4-122		
<b>Induction heating</b>			
Annealing Pipe Welds 'in Motion', by George F. Bobart .....	1-78		
Four Ways to Use Induction Heat Treating .....	1-81		
Heat Treating by Induction . . . Dual-Frequency Hardening, by Harry B. Osborn Jr. ....	1-73		
Heat Treating Gears and Shafts by Induction, by Clayton L. Kirk .....	1-68		
Heat Treating With Low-Frequency Currents, by Revel E. Jennings .....	1-71		
Heat Treating Stainless Steel by Induction, by Joseph F. Libsch and P. Capolongo .....	1-75		
<b>Inspection</b>			
How Chrysler Makes and Tests Automotive Castings, by Robert B. Boswell	4-225		
<b>Machining</b>			
Recommendations for Machining Ti-8Al-1Mo-1V and Ti-6Al-4V (ds) .....	5-87		
<b>Materials Application Competition</b>			
Chemical Vapor Deposition Makes Dense Tungsten Parts .....	5-93		
Cold-Worked Aluminum Foil Adds Capacitance, Trims Component Size ...	5-94		
Extruded Titanium Panels Cut Machining Time and Waste .....	6-99		
Jacket for Auto Steering Column Absorbs Impact, Protects Driver .....	5-93		
Molded-to-Shape Graphite Molds Eliminate Machining, Have Long Life ....	6-98		
<b>Materials engineering</b>			
MP Round Table . . . How Better Materials Engineering Can Combat Rising Costs .....	1-60		
<b>Materials selection</b>			
Metals and Nonmetals Make the Go-Truck Go, by Phillip M. Howard .....	6-100		
Selecting Alloys for Heat-Treated Auto and Truck Components, by Carl R. Weymueller .....	4-125		
<b>Mechanical testing</b>			
Determining General Hardness, by Roy H. Borgersen .....	2-110		
Determining Hardness at Elevated Temperatures, by Vincent E. Lysaght and Anthony DeBellis .....	2-103		
Drop-Weight Tear Test Reveals Fracture Toughness, by Robert Clark Anderson	2-113		
Hardness Testers for 'Soft' Materials, by Daryl G. Kasper .....	2-105		
How IBM Microhardness Tests Small Parts, by Robert H. O'Connor and George L. Smith .....	2-125		
How to Test All the Wires in a Strand, by William Henry .....	2-111		
Instruments That 'Stop and Look', by Charles E. Miller .....	2-107		
Light Tensile Machines Check Adhesive Bonds, by Robert E. Dillon .....	2-114		
Massive Bedplate Eases Testing of Earthmoving Equipment, by Carl R. Weymueller .....	2-129		
Plastic Coats 'Depict' Changes in Stress, by Thomas W. Corby Jr. ....	2-102		
Rating Hardnesses Electronically, by Kenneth J. Law .....	2-117		
Special Equipment Simulates Service, by T. W. Eichelberger .....	2-101		
Systems Approach Solves Test Equipment Problems, by Robert W. Churchill and Thomas L. Jackson .....	2-103		
Testing at Different Temperatures, Stresses and Strains, by Wylie J. Childs .....	2-116		
Testing for Right Material and Process, by Ross H. Supnik .....	2-121		
Testing Sheet Metals for Formability, by George L. Montgomery .....	3-121		
Versatile Tensile Machines Test Railroad Equipment, by David N. Erlenbach ..	2-120		
<b>Metallographic exhibit</b>			
One Picture Tells the Story . . . How Fatigue Cracks Grow in Air and Vacuum .....	6-82		
<b>Metallography</b>			
New Methods Point The Way, by Robert J. Gray .....	2-133		
The Niche for Automated Quantitative Microscopy, by George A. Ratz .....	2-153		
The Scanning Electron Microscope . . . Its Operation and Use, by Om Johari	2-147		

Nondestructive Testing Assuring Safety Through NDT, Staff Re-	2-73
Examining Prestressing Elements With Radiography, by Talmer L. Bailey . . . . .	2-77
Heat Fins Fatigue Cracks, by Edward J. Kubiak . . . . .	6-131
Guidelines for Nondestructive Testing Methods, by Don Hagemaler (ds) . . . . .	2-93
Inspecting Cold-Formed Shafts Auto- matically, by Donald D. Dodge . . . . .	2-93
Nondestructive Testing on the Production Line, by Carl R. Weymueller . . . . .	2-60
Testing Rocket Engine Materials, by Don Hagemaler . . . . .	2-87

Plasma-Needle-Arc Welding: More Reliability for Less Money, Staff Report.. 1-106

Exterior Applications of Plastics on Pontiacs, by Donald B. Dobbins ..... 4-191  
Materials Combination Eliminates Production Problems, by Donald J. Castle 4-205

Evaluating Sintered Saws, by Harry I. Hazzard .....	6-96
High Density Means Dependability, by Peter V. Schneider .....	6-93

Powder Metals in Tomorrow's Cars, by Carl R. Weymueller .....	4-171
Powders Beef-Up Al-Si Alloys, by Hugh M. Skelly and Cyril F. Dixon .....	5-103

The Niche for Automated Quantitative  
Microscopy, by George A. Ratz ..... 2-153

Examining Pressure Vessels With Radiography, by Talmer L. Bailey ..... 2-77

Refractories for Continuous Casting, by  
Gerald R. Cope ..... 3-109

MP Round Table . . . Competition Among Materials and Processes in the Automotive Industry: The Quiet Revolution . . . . .	4-110
MP Round Table . . . How Better Materials Engineering Can Combat Rising Costs . . . . .	1-60

How Crystallographic Texture Controls Drawability, by Roger L. Whiteley ..	5-81
New Knowledge About Sheet Steel . . .	
Influence of Mill Processing on Metallurgy, Formability, by Donald J. Blickwede .....	6-63
Testing Sheet Metals for Formability, by George L. Montgomery .....	3-121

Modified Ausforming Strengthens Springs,  
by Robert A. Bock and William M.  
Justusson ..... 6-107

## Heat Treating Stainless Steel by Induction, by Joseph F. Libsch and P. Capolongo ..... 1-75

Cooling Transformation Diagram for AISI 8640 (ds) .....	3-84
Eliminating Hydrogen Cracking, by William T. DeLong .....	5-74
Ferritic Forming Prevents Scaling and Decarburization, by George F. Mellay	6-119
Hardenable Bands for Special SAE H-Steels (ds) .....	1-87
How Crystallographic Texture Controls Drawability, by Roger L. Whiteley...	5-81
A Look at Automotive Technology in Europe, by Allen G. Gray .....	4-151
Mechanical Properties of Cold-Drawn, Carbon-Steel Bars (ds) .....	6-85
Modified Autofirming Strengthens Springs, by Robert A. Back and William M. Justusson .....	6-107
New Knowledge About Sheet Steel . . . Influence of Mill Processing on Metal- lurgy, Formability, by Donald J. Blick- wede .....	6-63
Selecting Alloys for Heat-Treated Auto and Truck Components, by Carl R. Weymueller .....	4-125
Selecting Steels for Heat-Treated Parts, by Roy F. Kern .....	
Part I—Direct-Hardenable Grades.	5-60
Part II—Case-Hardenable Grades..	6-70
Tailormade Steels . . . What They Are, How to Get Them, by Thomas E. Perry (interview) .....	3-72

Assuring Safety Through NDT, Staff Report	2-73
Determining General Hardness, by Roy H. Borgersen	2-110
Determining Hardness at Elevated Temperatures, by Vincent E. Lysaght and Anthony DeBellis	2-103
Drop-Weight Tear Test Reveals Fracture Toughness, by Robert Clark Anderson	2-113
Examining Pressure Vessels With Radiography, by Talmer L. Bailey	2-77
Guidelines for Nondestructive Testing Methods, by Don Hagemai (ds)	2-93
Hardness Testers for 'Soft' Materials, by Daryl G. Kasper	2-105
Heat Finds Fatigue Cracks, by Edward J. Kubiak	6-131
How IBM Microhardness Tests Small Parts, by Robert H. O'Connor and George L. Smith	2-125
How to Test All the Wires in a Strand, by William Henry	2-111
Inspecting Cold-Formed Shafts Automatically, by Donald D. Dodge	2-83
Instruments That 'Stop and Look', by Charles E. Miller	2-107
Light Tensile Machines Check Adhesive Bonds, by Robert E. Dillon	2-114
Massive Bedplate Eases Testing of Earth-moving Equipment, by Carl R. Weymueller	2-129
New Methods Point The Way, by Robert J. Gray	2-133
The Niche for Automated Quantitative Microscopy, by George A. Ratz	2-153
Nondestructive Testing on the Production Line, by Carl R. Weymueller	2-60
